

Mayors Blog - November 2016

November 1

Council continues to hold meetings in the schools. This week we went to AJ Baker. The children, in their delegation, chose to ask for assistance in setting up milk weed stations to help with the survival of the Monarch Butterfly. We will certainly have to comply and I look forward to helping the children with this very unique request.

I have learned recently that the procedure to dispose of unneeded ice booked by hockey and skating groups is not working. I personally think it might be better for the groups to take responsibility for doing this themselves. It may be that they will negotiate a lower price in order to save at least some of the money but this would be a win-win situation for both groups. Let me know what you think.
